SKILLS

Programming - Python, R, C

Web Frameworks - HTML, CSS, JS

Version Control: Git, GitHub

Artificial Intelligence - Machine Learning,
Agentic AI, RAG, LLMs, Lang chain, lang graph

Deep Learning - Neural Networks, NLP

Cloud Computing - Developer Associate(AWS)

Data Visualization & Reporting:

Power BI, Tableau

Database - MySQL, MongoDB

Project Management - Agile Methods,
Scrum Master

Soft Skills - Active Listener, Dedicated
Learner, Leadership

EDUCATION

BE - Artificial Intelligence and Data Science
RNSIT Engineering College

2023-2026

Bangalore - 560098, India

CGPA - 8.19 / 10

Diploma

CB Kore Polytechnic, Chikodi

2019-2022

Chikodi - 591201, India

Score - 66.36%

SSLC

K S S School, Jugul

2018-19

Jugul- 591242, India

Score - 78.08%

LANGUAGES

English
Hindi
Marathi
Kannada

PROFILE

Enthusiastic and technically skilled individual with a strong foundation in Data Science, Machine Learning, and Artificial Intelligence. Proficient in Python, SQL, and modern ML frameworks, with hands-on experience in developing predictive models(Kubernetes), NLP pipelines, Worked with Chroma for embedding retrieval in RAG pipelines. Adept at working with large datasets, feature engineering, and model deployment. Quick learner with a passion for innovation and continuous improvement, seeking to leverage AI expertise to solve complex challenges and deliver data-driven insights.

WORK EXPERIENCE

Project Lead – AI & Web Systems

2025- present

- Led development of VoiceGest, an AI assistant with voice commands, hand gesture control interaction using Flask, React, TensorFlow, LangChain with Hugging Face, MCP servers and MediaPipe.
- Created a **AI chatbot** for college info, and **stock price prediction** models using machine learning.

Tech Coordinator – College Events

College

July 2024 - Dec 2024

- Designed and developed websites, posters, and digital content for college tech fests and external clients.
- Managed UI/UX, coordinated event tech setups, and presented technical projects in college symposiums.

PROJECTS

VoiceGest (Voice & Gesture-Controlled Assistant)

- Designed and built VoiceGest, an AI-powered assistant combining speech recognition and hand gesture tracking using Python, Flask, MediaPipe, TensorFlow and JavaScript also LangChain, enabling users to control applications, UI elements, and system functions without physical contact.
- Implemented features such as voice-activated search, gesture-based tab navigation, screenshot capture, translation, Code generation and app control through a dynamic web interface, with modular architecture supporting real-time feedback, accessibility, and future integration of NLP, facial recognition, and 3D gesture control.

Chatbot for Educational Assistance | Python, Flask, NLP

- Developed an intelligent chatbot to assist students and faculty with academic queries, course details, schedules, and college-related services. Built using Flask, TensorFlow and integrated with natural language processing to deliver accurate, conversational responses. Deployed on a single-page college information portal.

AI-Powered Green Route Optimizer for Global Shipments

- Engineered a green logistics web app using Python, Flask, Scikit-learn (Random Forest, LR), and NumPy & Pandas to optimize shipment routes by cost, time, and emissions.
- Integrated React.js frontend with Google Maps API, RESTful APIs, and geospatial route data, leveraged real-time input handling, cargo weight analysis, and sustainability scoring.

COURSES

- Microsoft Azure Data Fundamentals | AZ-900
- Data Science for Engineers | NPTEL
- Project Management Essentials | Coursera
- SQL (Advanced) | Hackerrank
- GenAI Powered Data Analytics Job Simulation | Forage

POSITIONS & ACHIVEMENTS

- Team Lead– Developed VoiceGest AI assistant with voice and gesture-based interaction using Flask and MediaPipe.
- Design Head – Designing a Dashboard for Retail Company using Power BI for real-time sales insights.
- Hackathon- Built stock prediction model using Python and ML
- Kaggle Contributor – Completed data science mini projects with ML models and visualizations.
